

Section 2 – The Hard Sell - (30 Marks)

This Section has a weighting of 30%

Time Permitted : 60 Minutes

INTRODUCTION

The fantastic model you prepared earlier has now been reviewed and returned to you, some minor adjustments have been made. Functionality has been added to escalate the traffic classes separately and to cater for the expected increase of in the proportion of tag trips over time. Your director now has a much better understanding of the opportunity the Metro Connect investment presents.

Discussions continue to progress however a presentation of your analysis is required by the Board before the acquisition strategy can be approved. As a result, your director has arranged a meeting with the Board and requested you prepare a concise 'dashboard' (or tear-sheet) illustrating the key operational and financial outputs.

You have **60 minutes** to create a Letter or A4 size dashboard for the Board illustrating your findings visually. Your dashboard will be printed prior to providing it to the Board, as such there is no benefit to making your dashboard dynamic.

The Dashboard

The directors have raised a number of ideas throughout the morning which they would like to see in addition to any other information you consider crucial to the evaluation of the business:

- Summary Financial Statements (annually for 5 years)
- Debt profile
- Traffic profile

In particular you should include information useful to the CEO/CFO in relation to the proposed transaction.

You will be required to submit your workbook containing the model and dashboards.

CONVENTIONS AND PRESENTATION

Use the logo and color scheme below to style your dashboard. (The electronic versions are included in the provided model):

This question focuses on both the data included and the presentation. Layout and visual aesthetics will be considered in the Judges' assessment of this question.
