

Participant 1

Dataset: Accounting

Q: What is the ratio of debt to capital?

Features: Total liabilities, Capital

Chart Type: Stacked bar chart or Horizontally juxtaposed grouped bar chart

Dataset: Accounting

Q: What items exist in investment activities that generate cash flow, and what is the amount of cash flow generated by each item?

Features: Rows inside cash flow from investing activities

Chart Type: Diverging bar chart

Dataset: Accounting

Q: What items exist in operating activities that generate cash flow, and what is the amount of cash flow generated by each item?

Features: Rows inside cash flow from operating activities

Chart Type: Diverging bar chart

Dataset: Accounting

Q: Does the resulting cash flow pass the Debit/Credit validation?

Features: Items requiring a TRUE check (specific values unknown)

Chart Type: Table

Dataset: Accounting

Q: How has the sum of each asset item changed this year compared to last year?

Features: Total Current Assets, Total Inventory, Total Non-Current Assets, etc. (Sum of each item category)

Chart Type: Line chart

Dataset: Security

Q: How does the connection frequency of each L_ipn change over time?

Features: Time, Frequency

Chart Type: Line chart (x: Time, y: Frequency)

Dataset: Security

Q: Which combinations between L_ipn and target R_asn recorded high frequency?

Features: L_ipn, R_asn, Frequency

Chart Type: Heatmap (x: R_asn, y: L_ipn)

Dataset: Security

Q: Among L_ipn, which ones showed more connection attempts to R_asn compared to other IPs?

Features: L_ipn sorted by frequency, Accumulated connection frequency

Chart Type: Dot plot (x: L_ipn sorted by frequency, y: Accumulated connection frequency)

Dataset: Security

Q: Among the detected dangerous IPs, are there any IPs showing outlying connection patterns on specific dates?

Features: Date, Frequency (for each IP)

Chart Type: Small multiple timeseries line chart (x: Date, y: Frequency)

Dataset: Security

Q: When all access attempts are combined, what does the connection frequency pattern look like by date?

Features: Date, Overall frequency

Chart Type: Line chart (x: Date, y: Overall frequency)

Participant 2

Dataset: Security

Q: What is the purpose of the report? (To show the IP addresses connection attempt over time)

Features: Connection attempts, Time

Chart Type: Text/Overview

Dataset: Security

Q: What are the various activities that happened with the IP addresses over time?

Features: Frequency of connection, Time, Peaks (potential issues)

Chart Type: Line chart

Dataset: Security

Q: [Filter setup for Activities]

Features: Local IPs

Chart Type: A filter to filter out the local IPs, preselected to 0

Dataset: Security

Q: What are the problematic IP addresses?

Features: Individual IP addresses, Frequency

Chart Type: Bar chart showing individual IP addresses with their frequency

Dataset: Security

Q: What are the problematic IP addresses (specifically)?

Features: Problematic IP addresses, Frequency

Chart Type: Bar chart showing the problematic IP addresses only

Dataset: Security

Q: What is the difference between average and problematic connection attempts?

Features: IP connection attempts, Average connection attempts

Chart Type: Line chart showing IP addresses' connection with the average connection attempts as a static line to show deviation

Dataset: Accounting

Q: What is the purpose of the report?

Features: Company portfolios, Accounting statement, General financial overview

Chart Type: Text-based explanation

Dataset: Accounting

Q: What are the main cash flows?

Features: Cash flows from operating activities, investing activities, and financing activities

Chart Type: 3 Key Performance Indicators (KPIs)

Dataset: Accounting

Q: What are these cash flows from each activity further divided into? (Specifically Investing)

Features: Financial assets, Tangible assets, Individual cash flows

Chart Type: Bar chart with drill-down capability (Overview of financial vs tangible. Drill down to individual flows. Negative values in red; Positive in blue/green)

Dataset: Accounting

Q: What are these cash flows from each activity further divided into? (Specifically Operating)

Features: Operating activity items

Chart Type: Bar chart with drill-down capability (Same logic as investing)

Dataset: Accounting

Q: What is the company's overall credit and debit? Is the company financially solid?

Features: Liabilities, Equity (Credit side)

Chart Type: Waterfall chart

Dataset: Accounting

Q: What is the company's overall credit and debit? (Assets side)

Features: Assets (Debit side)

Chart Type: Waterfall chart

Dataset: Accounting

Q: What is the overall composition?

Features: Overall Debit, Overall Credit

Chart Type: Pie chart

Dataset: Accounting

Q: How does financial strength compare across years?

Features: Assets vs Liabilities, Year

Chart Type: Stacked bar chart for each year to show the difference

Participant 3

Dataset: Security

Q: Which groups of O (L_ipn) and D (R_asn) predominantly have large mutual flows?

Features: f values for each O and D

Chart Type: Matrix (O as rows, D as columns, color-encoded by 'f', reordered to find clusters)

Dataset: Security

Q: When O is "0", how much flow was there to which D?

Features: O="0", all D values, f values

Chart Type: Bar chart (x: D values, y: f values, sorted descending by f)

Dataset: Security

Q: What is the shape of the connection with the largest f value and its surrounding connections?

Features: O and D with largest f, and all O-D pairs with $f \geq 1$ related to them

Chart Type: Node-link diagram (Link thickness increases with f. Distinct colors for O and D)

Dataset: Security

Q: Which O has a large total flow to D?

Features: Aggregated flow values for all D for each O

Chart Type: Bar chart (x: O values, y: Sum of f, sorted descending by sum)

Dataset: Accounting

Q: How is the difference between the total amount of Current Assets and Non-Current Assets different in 2023 vs 2024?

Features: Total Current Assets (23, 24), Total Non-Current Assets (23, 24)

Chart Type: Grouped bar chart (x: Year, y: Amount, grouped by year)

Dataset: Accounting

Q: What is the trend of increase/decrease for each item in Cash Flow from Operating Activities?

Features: Increase/Decrease of: Trade receivables, Accrued income, Other receivables, Credit card receivables, Advance payments, Prepaid expenses

Chart Type: Diverging Bar chart (x: Item, y: Increase/Decrease. 0 in center. Positive/Negative colored differently)

Dataset: Accounting

Q: What percentage of the total does each item of Current Liabilities account for in 2024?

Features: 2024 Current Liability items (Non-trade accounts payable, Withholdings, VAT withholdings, Accrued taxes, Annual leave liability)

Chart Type: Pie chart (Angle proportional to amount)

Dataset: Accounting

Q: How have the ratios of Current Liability items changed between 2023 and 2024?

Features: 2023-2024 Current Liability items (Non-trade accounts payable, Withholdings, VAT withholdings, Accrued taxes, Annual leave liability)

Chart Type: Stacked bar chart (x: Year, y: Amount, 2 bars total, items stacked with distinct colors)

Participant 4

Dataset: Security

Q: How did the amount of connections change over the days?

Features: Count of distinct l_ipn, r_asn pairs, Date

Chart Type: Line chart (Count of pairs per day)

Dataset: Security

Q: How did the total volume of 'f' change over the days?

Features: Sum of 'f', Date

Chart Type: Line chart (Sum of 'f's each day)

Dataset: Security

Q: How consistent are the connections across the days?

Features: l_ipn, r_asn pairs status (same as day before, new, gone)

Chart Type: Bar chart (for each day showing the breakdown of status)

Dataset: Security

Q: How many days did specific connections appear?

Features: l_ipn, r_asn pairs, Count of days appeared

Chart Type: Bar chart

Dataset: Security

Q: Which days saw bursts of 'anomalous connections' happening?

Features: Days, log(f) binned (1-10, 10-100, etc.), Count

Chart Type: Binned scatter plot (Axes: Days and log(f), Point size: Count)

Dataset: Security

Q: Are there specific internal nodes liable for most of the traffic?

Features: Count of distinct r_asn from each l_ipn, Date

Chart Type: Multi-line chart

Dataset: Security

Q: What is the total flow volume for internal nodes?

Features: Sum of 'f's for each l_ipn

Chart Type: Multi-line chart

Dataset: Security

Q: Are there certain connections that had higher frequencies of 'anomalous connections'?

Features: l_ipn, r_asn pairs with f > 100 (or 0?), Total count
Chart Type: Sorted bar chart (Top n, e.g., 10)

Dataset: Security
Q: How many anomalies did specific connections have?
Features: l_ipn, r_asn pairs, Number of anomalies
Chart Type: Bar chart (x-axis: Number of anomalies)

Dataset: Security
Q: Do certain internal nodes receive more attacks than others?
Features: l_ipn with f > 100 (or 0?), Total count
Chart Type: Sorted bar chart

Dataset: Security
Q: Are certain external sources performing attacks?
Features: r_asn with f > 100 (or 0?), Total count
Chart Type: Sorted bar chart

Dataset: Security
Q: Do certain days (e.g., 9/11) observe more attacks than others?
Features: Frequency of l_ipn, r_asn pairs with f > 100 (or 0?), Date
Chart Type: Line chart

Dataset: Accounting
Q: Where did the entity see the greatest changes in the account book?
Features: Difference values (Diff)
Chart Type: Bar chart (Sorted, potentially custom scale)

Dataset: Accounting
Q: What constitutes the majority of the liquid assets for the two years?
Features: Accounts > Liquid assets category
Chart Type: Pie chart (Same category in different shades of same color, grouped, sorted, only major ones labeled)

Dataset: Accounting
Q: What is the net balance in each of the two years?
Features: Liabilities, Assets, Equity (Capital)
Chart Type: Stacked bar chart (Liabilities stacked downwards from 0, Assets stacked up from liabilities. Remainder shown as Capital)

Dataset: Accounting
Q: Which fields increased/decreased between the two years?
Features: 2024 values, Difference sign (+/-)
Chart Type: Zoomable treemap (Diff sign represented as colors)

Dataset: Accounting

Q: What are the main sources of income/expenses?

Features: Fields with positive values (Cols G-X)

Chart Type: Treemap or Pie chart (with shades of the same color)

Dataset: Accounting

Q: Were the changes in liquid assets greater than changes in illiquid assets?

Features: Normalized diff (+/-) changes w.r.t. total liquid/illiquid assets

Chart Type: (Implied comparison chart)

Dataset: Accounting

Q: Was there a general 'liquidation' of assets for cash, or 'purchase' of assets from cash?

Features: Raw diff (+/-) changes (not normalized)

Chart Type: (Implied comparison chart)

Dataset: Accounting

Q: How large is the ratio of depreciation of assets? Are there specific classes of assets that suffer greater depreciation?

Features: Depreciation values normalized by the asset value in the previous year

Chart Type: Pie chart or Bar chart (showing depreciation as a portion)

Dataset: Accounting

Q: What is the entity's ratio of self-assets (Equity) to liabilities in making up its assets for each year? Is it improving?

Features: Self-assets (Equity), Liabilities (Totals for each year)

Chart Type: Area chart or Pie charts
